

Langley Primary School PTA

Registered Charity No. 702301

Events held within School grounds – Safety and Risk Assessment

The scramble logs and traverse wall is considered an area of increased risk and should be monitored when in use and so at some PTA events this may be out of bounds or used as a supervised fundraising activity. If designated as out of bounds any child using this equipment will do so at their own risk and could be asked to leave.

All PTA run events will have a comprehensive Risk Assessment which will be approved by the school prior to the event. The Risk Assessment will include health & safety, safeguarding, supervisions levels and first aid arrangements.

Before the start of any event a short briefing will be held to ensure that all PTA members/helpers understand their role and responsibilities, safeguarding, Health & Safety and who to go to if they have any concerns or need help, the location of the first aider and kit will be clearly identified. This will also include information about which senior leaders are available and who is the DSL.
